NimbusDesk User Manual

Version 2.1 | Published 2024-03-15 | Brightwave Systems

1. Overview

NimbusDesk is a cloud helpdesk and team workspace from Brightwave Systems. Agents manage customer tickets, share saved replies and track response times from a single dashboard. This manual covers version 2.1 of the product.

2. Signing In and Passwords

Users sign in with an email address and password. Passwords must contain at least 8 characters. If you forget your password, select Forgot password on the sign-in page and a reset link is emailed to you. The password reset link is valid for 24 hours. After 5 failed sign-in attempts, the account is locked for 30 minutes. Sessions end automatically after 60 minutes of inactivity.

3. Two-Factor Authentication

Two-factor authentication (2FA) is optional for all users in version 2.1. Users can enable it from Profile > Security using an authenticator app. Single sign-on is available on the Enterprise plan only.

4. Notifications

NimbusDesk sends a daily email digest at 08:00 in the workspace time zone. Agents can switch off individual notification types from Profile > Notifications. Mentions in internal notes always trigger an immediate email.
